

POOLSPA

SMART 2

The technologically advanced SMART 2 system works on the principle of water and air massage. Using the unique solution - hygienic air ducts - has eliminated traditionally mounted air nozzles. As a result, the bottom of the bathtub is flat and the bath is more comfortable.

INFORMATIONS

The SMART 2 system guarantees the user, in addition to all the features of water massage, an additional possibility of the so-called bubble bath. The air massage is gentle: it has a relaxing effect and firms the skin. To ensure bath hygiene, like all PoolSpa hydromassage systems, SMART 2 is equipped with hoses with increased antibacterial properties.

Properties

Basic data

Control: **electronic**

Number of massage points: **50-90**

Drainage: **yes**

Electric heater: **nie**

Pump drainage: **yes**

Automatic disinfection: **no**

Water pump: **yes**

Piping with antibacterial properties: **yes**

Pulse massage: **no**

Flat nozzles: **no**

Filling through nozzles: **yes**

POOLSPA

Automatic drying of channels: **yes**

Pulse massage: **no**

Equipment

Water massage: **yes**

Air massage: **yes**

Underwater lights: **single point LED**

Telescopic skimmer-filter: **6-16**

LED thermometer: **no**

Air heater: **no**

Air massage

Air passages: **yes**

Hydro massage

Air passages: **6-16**

Mini-nozzles: **2-12**

Big nozzles: **4**

Fixed directional: **6-16**

Rotary: **0**

Water massage aeration: **58**

Ozoniser: **no**

Electrical connections

Supply voltage: **230 V AC 50 Hz**

Power cord cross-section: **3 x 1,5 mm²**

Network layout: **TN - S**
